

firexo

# ALL FIRES ONE ANSWER

- Extinguish **any type** of fire with **one extinguisher**
- Protect **people** and **places**
- Eco** safe and **environmentally friendly**

## WHY USE FIREXO?

- Has **massive retardant capability**
- When the fire is out **it stays out**
- **100% environmentally friendly** (Fluor Free)
- **Biodegradeable**
- **Non-toxic**
- Engineered with **fertilising capability**
- **Enhancing plant growth** after the fire
- **Fast and quick knock down**
- Designed **specifically for Class A fires**

## CASE STUDY

### 2019 Australia Bush Fire Facts

Water needed per acre: **102,789 LITRES**

Overall size of fire: **860,000**

This meant that fire-fighters needed 88,398,540,000 litres of water to put the fire out, simply put they were unable to obtain this amount of water, so it was impossible for them to put the fire out

**29** **2500** **2.5B** **\$160M**

PEOPLE  
DEAD

HOMES  
DESTROYED

ANIMALS  
LOST

INSURANCE  
CLAIMS (USD)

**\$780M**

COST OF  
FIRE

**\$33M**

DAILY DISRUPTION  
COST

**210**

DAYS FIRE WAS  
BURNING

**\$7.87B**

TOTAL MONETARY COST  
EXCLUDING LIVES &  
WILDLIFE (USD)

By comparison, we believe **one would need 514 litres of FIREXO solution per acre**, and we could of stopped the fire growing outwards, within 15 days and fully stopped within 30 days and a **possible total size of fire of 61,000 acres instead of 860,000.**

Firexo has been independently tested against all classes of fires to ensure the user remains protected when extinguishing a blaze.
